

I-84, TEN MILE INTERCHANGE

Construction Update

Aerial construction photo by Idaho Airships, February 2011

Ten Mile Road will open for north-south traffic in March. The speed limit will be 25 mph while construction continues.

The new Ten Mile Interchange is still closed for construction. It is on schedule to open in early summer. It will include on- and off-ramps for I-84.

Please drive carefully. Crews are still working on the ramps, turn lanes, landscaping, lighting and signage.

I-84 will be restricted this spring/summer while crews pave under the bridge.

The Ada County Highway District is widening Ten Mile Road between the Ridenbaugh Canal (south of I-84) and Overland Road. Visit www.achdidaho.org (click on "Projects and Studies") for details.

Ten Mile Road will re-open in March.

The road will be one lane
in both directions between
Franklin and Overland roads
until the new I-84
interchange is completed
in early summer.
